

DESCRIPTION

The CineGrey is a high-contrast gray front projection material designed to improve contrast by enhancing black levels and color saturation. The gray surface delivers more natural deeper blacks and improved shadow detail while preserving a neutral color balance. CineGrey has wide diffusion uniformity to ensure equal brightness across the entire projection surface. It has black backing to eliminate light penetration to avoid picture degradation. It works best in a light controlled environment preferably for dedicated home theater applications.

MATERIAL SPECIFICATIONS

- Multi-layer PVC with texture and surface coating
- Enhances color contrast and black levels
- 1.0 gain with 160° (80° ±LR) wide viewing angle
- Material is Mildew Resistant
- Surface can be cleaned with (water) moist cotton cloth
- Active 3D, 4K/8K Ultra HD, and HDR ready
- Integrated black-backing eliminates light bleed loss
- Compatible with ultra/short, and standard throw projectors

Half Gain: 80
Viewing Angle: 160°

Projection Type: Front Only
Color: Grey

Resolution: 4K/8K

GAIN CHART

On axis 0° Gain: 1.0
Viewing Cone: 160°
