

Tripod Pro Series White Paper

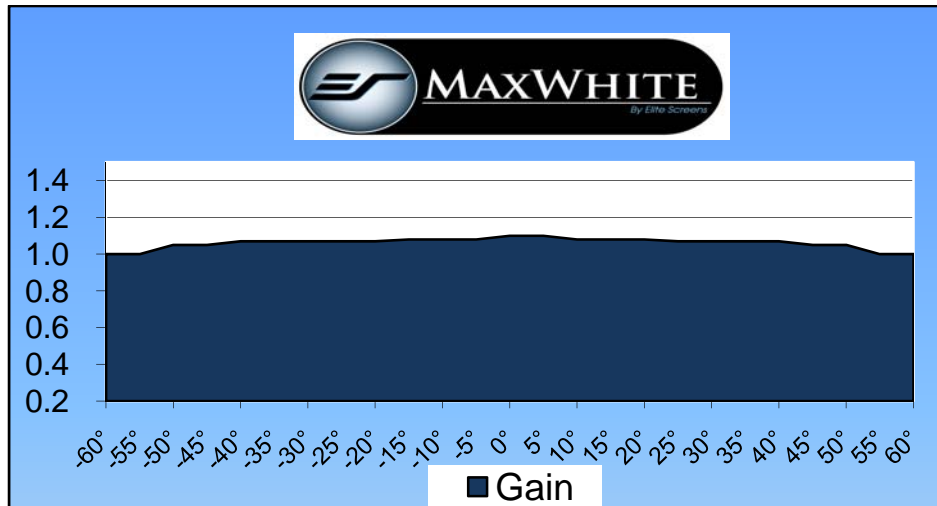

Type of product: Tripod portable pull-up front projection screen

Type of Retract Control System: The Tripod Pro series screen utilizes an internal spring mechanism to allow the screen to be pulled out and retracted at certain intervals to accommodate various height settings. The handle of the screen must always be held at all times when pulling or retracting the screen to avoid damaged to the screen.

Type of housing: The Tripod Pro Series uses an all steel housing covered in velvet.

Sizes and format(s) available: 85" – 119" (seamless) Diagonal in 1:1 aspect ratio

Type of screen material: MaxWhite (matte white) PVC material. MaxWhite screen material is the most versatile screen surface for front projection presentations. This material provides the widest possible viewer angles with perfect diffusion uniformity while giving precise definition, image color reproduction and black & white contrast. Screen surface has black-backing to avoid light penetration and can be cleaned safely with mild soap and water. Woven screen material is a multi-layer, cross-array coated with a matte white reflective compound. The gain on this material is 1.1 and has a viewing angle of 160 degrees.

Certifications: ISO 9001 : 2000, ETL, CE
